

### **Blacklight Pool Table by Toulet**

#### **Product Overview:**

In the Blacklight Designer Pool Table we have created a piece of furniture that is both a modern version of the traditional game and much more. Where the classic table design was made based on the single surface and four legs concept, this one's basically a giant ribbon. The simple silhouette works with many types of contemporary decor.

This revolutionary table took six months to design, in conjunction with six visionaries from the Superior Institute of Design, located in the north of France. Great attention to detail and a back to the drawing board approach has achieved a harmony of shapes and visual quality atypical of billiard tables.

The entire table is made without wood, instead opting for steel and resin, respecting traditional design only in the use of quality slate for the playing surface.

The 22mm one-piece ground slate ensures perfect flatness with 65mm jacks for incomparable adjustment and a lifetime warranty. Simonis cloth and Kléber Michelin competition cushions deliver unparalleled accuracy and consistency to the discerning player and leather finished pockets add a luxury finish to satisfaction of the pot.

Truly individual styling is possible with Blacklight, the cabinet is available in a choice of 27 lacquered or matte finishes. Luxury gold, chrome, brushed stainless steel, copper, pearly white or leather finishing is also available. In addition, cloth may be specified in more than 27 colours or even fully customized designs.

Optional extras include, internal lighting, poker and dining tabletops, a matching pendant light, cue sticks, cue stick holders. With this outstanding level of personalization the Blacklight Pool Table can become an integral part of your living space.

Technical FAQ's

How large does my room need to be?

For a 8' x 4' size table we recommend a room of at least 15.5 x 12 feet (4.7 x 3.7 metres) if using 48" cues. Longer 58" cues require 17 x 13.5 feet (5.1 x 4.1 metres).
